

2,4-DB plus MCPA

Tradename: Formerly **Medicamine** by Agchem

See 2,4-DB and MCPA for label information.

This is a mixture of 2,4-DB and MCPA that was formulated to be less damaging to medics than MCPA alone or 2,4-D.

A similar product can be made by mixing equal quantities of 2,4-DB and MCPA. Rates quoted in HerbiGuide are for a 1:1 tank mix. A rate of 1000 mL/ha is equivalent to 500 mL/ha of 2,4-DB(400g/L) plus 500 mL/ha of MCPA amine(500g/L).
